

## Specification Sheet

### 40mm Sandwich Panels

Our 40mm steel clad sandwich panels are constructed from two 4mm thick steel outer sheaths with a rigid PUR foam filler. This polyurethane foam with its diffusion-proof outer-skins offers some of the best insulation on the market.

Thermal insulation is important for the following reasons:

- » It lessens heat loss through the walls and roof
- » It helps maintain the correct air balance for the building's occupants
- » It protects the building itself against the damaging effects of damp
- » It lessens energy consumption for heating and cooling
- » It keeps production and management costs down.

#### Colour

Unless otherwise specified walling colour is standard Goosewing Grey BS10 A05

## 40mm Sandwich Panels

ST/SPEC/0001/01
