REQUIREMENT

Midlands Fixings Ltd. are the leading supplier of products such as pipework to building services contractors. Due to demand, they needed extra warehousing to store their stock, so turned to Spaciotempo. We provided them with a 11m by 14m temporary storage building at their site in Beeston.

Midlands Fixings Ltd.

Temporary Storage

SOLUTION:

Midlands Fixings Ltd. are the leading supplier of products such as pipework to building services contractors. Due to an increase in demand, they needed extra warehousing to store their stock. They specifically needed a building that was quick to install, flexible as the demand was unknown, secure and could protect from all weather conditions.

After contacting Spaciotempo, we began to work collaboratively with the customer to provide a bespoke

temporary building that suited them. With our own in-house CAD designer, we created a building that matched their brand and fitted in with their current on-site buildings perfectly. Our installation teams were able to install the building within a matter of weeks and Midlands Fixings Ltd. were able to trade as normal with minimal disruption.

Their temporary storage building had an aluminium frame calculated to meet British Safety Standards,

Wind Loading BS6399 and General Snow Loading BS6399, the same as a permanent building. Also, thermo roof and gables, 1 single personnel exit door, double personnel exit door and an electric roller shutter door. We also provided Midlands Fixings Ltd. with grey white flashing which matched their branding and made the building blend in with their other on-site structures.
