REQUIREMENT

Accrington based weaving company Spa Web Ltd. came to Spaciotempo for some extra on-site storage space. They develop industrial webbing and tapes for a range of applications. However, they needed some additional warehousing for stock before it went into production.

Spa Web Ltd.

Temporary Warehouse

SOLUTION:

Spa Web Ltd. who are based in Accrington, develop industrial webbing and tapes for a range of applications. Due to a sudden influx in demand they needed some extra on-site storage to protect their product. Because their materials are easily damaged it was extremely important that the stock was kept secure and dry.

They turned to Spaciotempo who came up with the ideal solution. A 10m by 13m temporary warehouse

on a 6m eave. Due to us being able to design, manufacture and install our own products, we could react to Spa Web Ltd.'s request quickly and efficiently. Additionally, we were able to create a bespoke design that included yellow flashing on the building. This ensured that the temporary warehouse, matched their current site buildings and fitted in with their brand.

The temporary storage structure consisted of an aluminium frame,

thermo roof and gable to ensure the product stayed dry, single sheet steel cladding, 1 single personnel exit door and electric roller shutter door, 2 LED lights and 26m of guttering.

Scott Jameson, Spaciotempo's Managing Director, stated *"Spaciotempo work collaboratively with all our customers to ensure we create a temporary building that suits all their storage needs. With our own in-house CAD designer, we can create the ideal solution for every brand."*
