

# Mars-Jones Ltd.

## Loading Canopy

### FACT FILE

**Who:** Mars-Jones Ltd.

**Where:** Deeside

**Size:** 13m x 19m on a 6.6m eave

**Use:** Loading Canopy

**Special Features:** Spaciotempo prefabricated link to their permanent building and perforated steel cladding

### REQUIREMENT

Leading transport company and family owned business Mars-Jones Ltd. contacted Spaciotempo, after a recommendation from a previous customer. They had recently opened their new site in Deeside and required a loading canopy to protect product and staff from the weather. We provided them with a 13m by 19m loading canopy on a 6.6m eave. This included one wall of perforated steel cladding and a prefabricated Spaciotempo link, which connected to their existing facilities.

## Loading Canopy

### SOLUTION:

After a recommendation from one of Spaciotempo's previous customers, leading transport company and family owned business Mars-Jones Ltd. contacted Spaciotempo. The company had recently opened their new office in Deeside and required a loading canopy to protect their products and staff from the weather.

Following a full site scan conducted by our own in-house operations teams and a CAD design, we provided Mars-Jones Ltd. with a 13m by 19m loading canopy on a 6.6m eave. To protect the products and staff further, the canopy consisted of single sheet steel side elevation and perforated steel

cladding at the rear. This enabled any wind to get through and therefore increase protection. In addition, we installed one of our first prefabricated links, which connected the canopy to their existing permanent building. In total, the new temporary canopy provided Mars-Jones Ltd. with an additional 247sqm of covered, protected space.

Dan Barker, Sales Manager at Spaciotempo comments, "When Mars-Jones Ltd. first approached us, it was great to hear that our previous customers are so satisfied with our product that they recommend us to other clients."

Phillip Mars-Jones, Managing Director for Mars-Jones Ltd. states, "Spaciotempo had an exceptional knowledge base and incredible team. We first knew about them from a recommendation who had previously used the company and had said about the overall quality of their products. Their sales, operations and installation teams were fantastic, advising about the prefabricated walling and coming up with the link idea. We are extremely happy with our finished temporary canopy and will definitely be recommending them."
