

# Multimatic

## Temporary On-Site Storage

### FACT FILE

**Who:** Multimatic

**Where:** Coventry

**Size:** 20m x 50m on an 8m eave

**Use:** Extra on-site storage space

**Special Features:** 8m eave to allow racking to be installed from floor to ceiling

### REQUIREMENT

To reduce on site facility costs at their UK headquarters and as part of a strategic business move, Multimatic turned to Spaciotempo. As a global supplier to the automotive industry, Multimatic invested in a temporary building to extend their storage space and increase their manufacturing. We provided them with a 20m by 50m temporary storage building on an 8m eave.

# Multimatic

## Temporary On-Site Storage

### SOLUTION:

Global supplier to the automotive industry, Multimatic first approached Spaciotempo back in 2016 at the IMHX exhibition. Following a key business decision, Multimatic wanted to reduce their on-site costs at their UK headquarters in Coventry. They needed extensive space to manufacture high volume parts including engineering for components, systems and body/chassis structures, for mainstream automotive manufacturers.

Currently, Multimatic were using a warehouse they were renting to accommodate overflow stock and materials. A key requirement of the project was being able to install racking for storage, as Multimatic

stores wide varieties of materials and components for use with different manufacturers. The company required a tall building to maximise storage space and ensure that the warehousing facility would continue running smoothly.

So, we supplied and installed a 20m by 50m building from our leading Neivalu range, to last Multimatic at least the next 15 years. The building included an 8m eave that is unobstructed in height, allowing racking to be installed from floor to ceiling. In total, the new building provided Multimatic an extra 1,000sqm of warehousing space. To also ensure that the building would withstand the robust, heavy-duty

activity taking place within, solid gables and Armco were fitted to the building. Also, a wide roller shutter door for vehicle access, and a thermo roof to retain heat.

*Paul Cleaver, Assistant General Manager of Multimatic, said, "We were incredibly impressed with Spaciotempo's response, ever since day one when we met them. Communication with Adam and their team was brilliant, and it was their ability to provide a building with an unobstructed apex that really won us over. The new solution gives us more than enough storage space and the floor-to-ceiling racking is a great feature for our logistics team."*

### SPECIFICATIONS:

- › **20m by 50m on a 8m eave** – total area 1000sqm with a ridge height of 11.41m
- › **Frame:** Hard pressed, extruded aluminium box profile – snow and wind loading BS6399, equivalent to permanent buildings.
- › **Roof:** White PVC coated polyester fabric flame retardant to BS7837; thermo roof and gables.
- › **Walling:** Single sheet steel cladding
- › **Doors:** 4 x single personnel exit doors, 1 x manual roller shutter door
- › **Guttering:** 100m (50m to each side)
- › **Lighting:** 18 x 250w high-bay mercury Lights

**Spaciotempo is the UK's leading expert in the design, manufacture, hire and sale of temporary buildings to a broad range of sectors.**
